Lessons I Learned Along the Way

- Undergrad → real-world job → a *different* grad school ✓

Lessons I Learned Along the Way

- Undergrad → real-world job → a *different* grad school ✓
- Watch for intellectual inertia in computing, and exploit it.
  - "Parallel computing is faster but… I don't wanna recode."
  - "Floating-point is terrible, but you just have to live with it."

Lessons I Learned Along the Way

- Undergrad → real-world job → a *different* grad school ✓
- Watch for intellectual inertia in computing, and exploit it.
  - "Parallel computing is faster but… I don't wanna recode."
  - "Floating-point is terrible, but you just have to live with it."
- Job-hopping is good for a high-tech career, and often necessary
